

BMO Tactical Global Growth ETF Fund

Core Tactical/Strategic Portfolio Outlook/Adjustments

Our chart of the week shows the MSCI world index and the percentage of members above the 200-day average. In the concept of market breadth, a strong market is where most stocks are trending higher. Until the recent Fed pause and the funding shift by Treasury, the average stock globally was struggling. The recent rally is likely temporary versus sticky given that higher for longer is still the message, the UR is still at full employment and inflation is likely to remain sticky with easier financial conditions. To be clear, we remain in the hard landing camp. On the last decline, we reduced the protection on the portfolio as valuations improved. The rapid rally makes valuations poor again. We do see bond supply putting a cap on the bond rally, but perhaps there is a bit more to come until we see the next series of inflation and jobs data. We made no trades last week, but we are looking to unhedged some of the EAFE currency exposure Buy ZEA/Sell ZDM that we put on Sep 25th. We typically look to make 3-5% on currency trades.

Top Holdings					
Ticker	Name	Position			
RSP	Invesco S&P 500 Equal Weight ETF	15.5%

Macro Market Strategy

While it appears now that we are much closer to the terminal rate, we do not see an easing until the market and Main Street feels more pain. The FOMC does not expect inflation to return to target until 2025, which suggests that higher for longer is here well into 2024. Main street has felt no pain yet given the employment situation is still relatively strong. Historically, we do not see the bottom is in until Main Street feels the recession. It does not have to be deep, but no cycle in history has ever bottomed at full employment. Inflation is unlikely to get back towards the Feds target without some labour market pain that the FOMC is willing to endure to make sure inflation expectations are grounded. A soft landing is an extremely low probability that is fully priced in.

This update has been prepared by ETF Capital Management, the portfolio manager of BMO Tactical Global Growth ETF Fund and represents their assessment at the time of publication. The views are subject to change without notice as markets change over time. The information contained herein is not, and should not be construed as, investment advice to any party. Investments should be evaluated relative to the individual's investment objectives and professional advice should be obtained with respect to any circumstance. Any statement that necessarily depends on future events may be a forward-looking statement. This material may contain forward-looking statements. "Forward-looking statements," can be identified by the use of forward-looking terminology such as "may", "should", "expect", "anticipate", "outlook", "project", "estimate", "intend", "continue" or "believe" or the negatives thereof, or variations thereon, or other comparable terminology. Investors are cautioned not to place undue reliance on such statements, as actual results could differ materially due to various risks and uncertainties. 1 The benchmark is the return of the targeted portfolio. 2 Beta is a measure of how a fund responds to moves in the broader market. A beta of greater than 1.0 suggests that the fund is more volatile than the market, while a beta of less than 1.0 suggests that the fund is less volatile. 3 Yield is the most recent income received by the fund in the form of dividends, interest and other income annualized based on the payment frequency, divided by the current market value of the fund's investments. 4 Volatility is the annualized standard deviation which is a measure of risk. 5 Upside/Downside is a statistical measure of how much of the fund performance a manager captured during up-markets or down-markets. Typically, an investor would prefer a higher upside capture and lower downside capture. The time period presented is since inception. 6 Standard Deviation is a measure of risk that calculates the variation of a fund's performance around its average over a specific time period. ETF Capital Management is a registered trade name of Quintessence Wealth, a Portfolio Manager, Investment Fund Manager and Exempt Market Dealer registered with the Canadian Securities Administrators. Commissions, trailing commissions (if applicable), management fees and expenses all may be associated with mutual fund investments. Please read the fund facts or prospectus of the relevant mutual fund before investing. The indicated rates of return are the historical annual compounded total returns for the period indicated including changes in unit value and reinvestment of all distributions and does not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Distributions are not guaranteed and are subject to change and/or elimination.
